# Recent Trends in Securities Class Action Litigation: 2020 Full-Year Review

COVID-19-Related Filings Accounted for 10% of Total Filings

Filings Declined, Driven Primarily by Fewer Merger Objections Filed

Even After Excluding “Mega” Settlements, Recent Settlement Values Remained High

By Janeen McIntosh and Svetlana Starykh

## Foreword

I am excited to share NERA's Recent Trends in Securities Class Action Litigation: 2020 Full-Year Review. This year's edition builds on work carried out over many years by members of NERA's Securities and Finance Practice. In this year's report, we continue our analyses of trends in filings and resolutions and present information on new developments, including case filings related to COVID-19. Although space does not permit us to present all the analyses the authors have undertaken while working (remotely!) on this year's edition, we hope you will contact us if you want to learn more about our work in and related to securities litigation. On behalf of NERA's Securities and Finance Practice, I thank you for taking the time to review our work and hope you find it informative.

Dr. David Tabak  
Managing Director

### Median Investor Losses and Median Ratio of Actual Settlements to Investor Losses

Following a spike in the median Investor Losses in 2013, the median Investor Losses showed only minor year-to-year fluctuations through 2019. In 2020, the median Investor Losses rose dramatically, reaching a record-setting high of \$805 million. This median is nearly 70% higher than the median value for 2019 of \$478 million and 7% higher than the 2013 median value of \$750 million. For all years between 2017 and 2019, the median ratio of settlement to Investor Losses was above 2%, a higher ratio than was observed in any of the prior five years. Despite the increase in settlement values in 2020, the increase in Investor Losses led to a decline in the median ratio of settlement to Investor Losses. For 2020, the median ratio of settlement to Investor Losses was 1.7%, one of the lowest ratios observed in the last nine years. See Figure 16.
